Experiences

NIELSEN | Member of Technical Staff *June'24 – Ongoing*

- Migrated 3+ legacy dashboards from **Ant** to **Maven** and maintained end-to-end workflow involving **Oracle DB**, **Informatica**, and multiple server jobs (like db2db sync job, extract file, load file), improving monitoring coverage by **40%**.
- Revamped core workflows using **async logic**, reducing process time by **30%** and enhancing scalability across markets.
- Resolved critical **security flaw** by patching leaked Oracle DB credentials, ensuring compliance and securing 100k+ entries.
- Added **NY Hispanic demographic column** to auto-generated PDFs, extending analytics for **20M+ users**.
- Delivering **24/7 weekly on-call support**, resolving **10+ p0 issues** (e.g., Atlanta time-shift, partition key errors), ensuring **100% SLA compliance** with zero client delivery delays.

PHYSICSWALLAH | Software Developer *Jun'23 - May'24*

- Created detailed **LLD** for the **Student Classroom Program**, a virtual classroom system simulating real-world presence — enabling visibility of up to **50+ students per session** and seamless instructor-student interaction.
- Resolved **1M+ stuck Juspay transactions** by developing a **cron-based reconciliation system** that synchronized two microservices, accurately mapping orders to their payments — ensuring seamless flow for all FY23 transactions.
- Optimized high-traffic APIs (**Cohort, Courses, and Purchase APIs**) using **Redis caching** and algorithmic tuning, cutting **p90 latency** from 600ms to 30ms during peak load (e.g., **Vishwas Diwas** sale) monitored via **Grafana/DataDog**
- Automated SMS invites with meeting links via **Twilio SMS API**, increasing session attendance by **50%**.
- Boosted platform efficiency by **25%** through enhancements in **Cohorts, Batches, Payments**, and added innovative features like **Invoice** engine and **Snooze**.

BUZZLE | Web Developer Intern *June'22 - Aug'22*

- Integrated APIs and Payment Gateways for **over 100** Exclusive Live Events
- Achieved a **70% efficiency** rate in audio interaction during live collaboration

Education

Dr B R Ambedkar National Institute of Technology *2019 - 2023*

– B.Tech in Industrial and Production Engineering *CGPA - 7.78*

Achievements

- Rated **1538** on **LeetCode** with a best global rank of **4233** among **22000**
- Achieved the highest Rating **1552** on **LeetCode** with global rank of **5898** among **21000**

Projects

STOCKKART (Inventory Platform) | Github | Website *Dec'25 - Present*

- Designed a modular Spring Boot backend with plugin-based architecture, reducing domain-specific code duplication by 35% while supporting multi-tenant shop onboarding.
- Implemented durable reminder and event processing using MongoDB-backed schedulers and SSE notifications, ensuring 99.9% reminder delivery reliability across server restarts.
- Improved inventory visibility and decision-making by 30% through lot-level tracking, expiry-based alerts, and role-restricted analytics for admins and cashiers.

AROGYAM-CLINIC | Github | Website *Nov'24 - Feb'25*

- Engineered full-stack clinic platform from scratch, scaling to 15k+ patients with 99.9% uptime and secure **JWT** auth.
- Designed slot booking system processing 1000+ appointments/week and **role-based access control RBAC** for users.
- Set up CI/CD via **GitHub Actions**, deployed on **DigitalOcean**, optimized image uploads for 10,000+ records.

Skills

- **Languages Databases:** C, C++, Java, JavaScript, TypeScript, SQL, Oracle DB, PostgreSQL, MongoDB, Redis
- **Frameworks Platforms:** Spring Boot, NestJS, Node.js, React.js, Sencha Ext JS, Apache Kafka, Apache Tomcat
- **Tools DevOps:** Maven, Gradle, Jenkins, Git/GitHub, GitHub Actions, ArgoCD, Render, Vercel, DigitalOcean SDK, WinSCP
- **Monitoring Analytics:** DataDog, Prometheus, Grafana
- **Skills Concepts:** Data Structures Algorithms, Microservices, REST APIs, JWT Authentication, Event-Driven Architecture, Informatica, Google APIs, CI/CD, Agile Development
